Washington, D. C.

Subject: Contract No. AF33(600)-37828 - Partial List of
Machine Tool Reserve Items

Gentlemen:

In accordance with your instructions we have screened available lists of machine tools at Warner-Robbins Air Materiel Area against the requirements of the development portion of subject contract. The attached summary, in three copies, lists those tools which were found to be available and, which, subject to favorable inspection reports, could be used in the performance of the work. It is requested that holds be placed on these tools and that we be advised when our representatives may plan a trip to perform the necessary inspections.

In order to be most useful to the performance of the contract certain of these tools should be available for use about the 1st of June, 1959; to the extent that further delays occur, performance of the over-all development job will suffer.

It is possible that further screening will reveal other machine tools suitable for the required work, in which case additional lists will be sent you. We will appreciate receiving your further instructions and will be happy to have our representatives discuss with you any aspects of these requirements at your convenience.

Yours very truly,
